CS270 Coin Sorter Sorting & Counting

The CS270 Coin Sorter is specifically designed to sort and count mixed coins.

Mixed coin is put into the top of the machine (which acts as a hopper) and is sorted into individual compartments using a sorting plate.

This machine sorts by using the diameter of the coins to differentiate.

The operating panel gives a running total as the coins are being sorted.

A maximum of eight different denominations can be sorted, and counted at the same time.

The CS270 has a batching function, which allows the user to count out a set amount of one denomination to assist in the bagging of coin.

Ambient temperature	0°C ~ 40°C
Ambient Humidity	30 ~ 80%
Hopper capacity	<500 units
Each coin drawer	80 ~ 200 units
Batch preset number display	3 Digits LED
Counting number display	4 Digits LED
Power source	AC220V / 50Hz
Power consumption	45w (max)
Dimensions	345 x 306 x 260 (mm)
Net weight	3.9kg
Counting speed	200 units (max) / min
