

Forgery Detection Pen

The First Line of Defense against Fraud

An efficient, and easy way, to stop suspect notes from entering your tills.

Simply draw a line on the note with the **Forgery Detection Pen**. The pen uses the latest patented chemical technology that reacts with the composition of paper in the notes.

The response is immediate:
You know straightaway if the note is suspect or not.

Detection Technology:

- A genuine note will be temporarily marked with a clear, light amber mark.
- A suspect note will be permanently marked with a dark brown/gray mark.

The **Forgery Detection Pen** can be used on all Euro & Sterling notes, and a further 200 different currencies worldwide.

Specifications:

- A single pen can test up to 12,000 notes.
- Packet of 10 pens 1kg.
