

## CashMan™ for Cash in Transit

### Designed to reduce costs and increase productivity

**CashMan™ for Cash in Transit** companies is a fully integrated Cash Management system introduced by Money Point. Our **CashMan™ for CIT** system is designed specifically for the Cash in Transit industry to control and reduce the cost of handling cash in a performance and price-sensitive marketplace.

The aim of the system is to reduce costs and increase productivity for Cash in Transit companies involved in handling cash. This is achieved by computerising, integrating and optimising all the stages in the CIT Cash Handling process.

**CashMan™ for Cash in Transits** extensive functionality is designed to increase process efficiency by integrating the work of receipting, deposit balancing, fitness sorting, stock, ordering and dispatch.

## The system includes

**The CashMan™ for Cash in Transit System covers all the fundamental requirements of CIT operations, including:**

- Bag tracking of deliveries and collections
- Customer deposit processing and balancing
- ATM Order Fulfilment and return cash balancing
- Automated error letter production and account updating
- Note and coin sorting machine integration
- Multi-currency support
- Stock control over multiple currencies, denominations and locations
- Cash ordering
- Charging of customers for cash processing services
- Customer reporting
- Multi-site support
- Head Office replication and reporting
- Display board productivity reporting

## Features & Benefits

**The CashMan™ for CIT system includes specialist modules to cover the principal areas of handling cash, namely:**

### Features:
