PRO COIN TM301 High Volume Coin Sorter

The model TM301 is a rail coin sorter that can count and sort up to eight coin denominations.

It utilises the very latest (foreign) coin detection system 'Coinsure'.

The sorting is done using coin recognition technology.

Output is to a single drawer per denomination, with an additional area for rejected coins

Additional Components

Mixed coin tray holder

Facilitates coin loading from the front of the machines for a lower volume of coins.

Optional Extra

Coin Bagging Unit

The coin-bagging unit facilitates automatic bagging straight from the machine.
