

Julong JL206F Bank Note Fitness Sorter

Description

The Julong JL206F is a 1½ Pocket note sorter capable of fitness sorting, authentication, value counting and denomination sorting. Additionally, the unit can be utilized as a serial number capturing device, keeping track of all numbers of the notes processed. The big, bright and colourful touch-screen shows all data related to the operation. The JL206F is ECB approved and can provide the necessary Central Bank reporting data required for Banknote Recycling Framework compliance. This is one of the smallest desk top note sorters available.
