

Julong JL303 Bank Note Fitness Sorter

Description

The JL303 is a fitness sorter designed to separate ATM or ECB fit and unfit notes. It can be used for mixed denomination value counting, so the machine is an aid for busy front desk cashiers balancing customer deposits or in the back office, performing fitness sorting or deposit verification of larger commercial deposits. The machine can be used for a variety of tasks such as currency value counter, ATM loading and balancing, fitness sorting, mixed deposit balancing and dispensing.

Modes of Operation

- Normal and value counter.
- Denomination sorter.
- Condition sorter.

Authenticity

Pattern detector, IR and visual, UV paper detector, Magnetic properties detector. Various other customized detectors can be installed, depending on the notes processed.
