

K12 Fitness Sorting Machine

Main Features

1. K-12 is the industry's first Fitness Sorting Machine with 12+1 Pockets that has the smallest floor space.
2. High Processing Speed reaches to max. 900 notes/min.
3. The Colour Touch Screen with Graphic 5.7inch helps user operation easier.
4. K12 has been designed almost the same machinery as K4 and K8. Therefore the special training for the operation, the maintenance and the replacement of the parts will not be necessary for the customer and the technician.
5. The compact size of K12 as the Fitness Sorting Machines is not only the attractive point of the machine, but also the high performance with low price will be attractive to you and to your customer.
6. K12 has various sorting patterns which can full fill the customer demand.
7. Various options such as OSD-1 and the Customer display, Printer are available for K12.
8. Options I/F Kit for RS232C and LAN, USB are available for several operations.
