

## Band-A-Matic 7110 Automatic Strapping Machine

### Description

The "Band-A-Matic 7110, a new state of the art Strapping Machine from Japan. It's features include automatic strap loading, loop eject and end of reel strap ejection.

If machine is activated in error a small loop of strap is formed and ejected. Just remove the loop and push the start button to re-feed and is machine is ready to operate. Strap loading is easy, just insert the strap into the infeed guide and push the start button.

The strap tension is adjustable from the outside control panel from 3 – 70 kilos.

The 7110 machine is manufactured in JAPAN to the highest standards and applies the latest technology in components and manufacturing process.

The machine is simple to use, reliable and robust and carries the CE mark.

Money Point provides a full backup service including spare parts stock and PP strapping in a range of sizes and colours including printed strap.

A service contract is available on request.
