CMX40 High Speed Coin Sorter

Description

The CMX40 from South Automation is a heavy duty high speed coin sorter and counter that allows value counting, sorting and batching for 8 denominations. The CMX40 also has the facility to bag or tube coins so that they can be easily recycled. This machine is robust enough to be run continuously in a full time cash processing operation.

Technology

The contactless and wear-free cashMAX® detection system measures 3 parameters of the coin in order to recognize the denomination or to reject it in case of suspect parameters. The detection system is regularly certified by various national banks. The CMX40 interface has been designed for rough environments. The robust rubber keys are designed for 24/7 operation. The processes are optimized for operational efficiency where every second counts. The width of the standard hopper is large enough to fill coins out from a cashier box. The belt driven feeding system makes sure that up to 6500 coins are transported to the counting mechanism without manual intervention. This means more time for you to take care of other tasks.

Specifications

- Memory: Count, total & bag contents ; individual for 8 cashiers
- Hopper capacity: standard euro mix - 3800 coins, max - 6500 coins
- Speed: 2300 coins per minute
- Communication interfaces: RS232, printer, display (included printer in CMX40)
- Approvals: CE, ROHS, Tested according to European Directive No. 1210/2010
- Dimensions: 455(h) x 360(d) x 820(w)
- Weight: 58kg

Unit 19, Turvey Business Centre, Turvey, Co. Dublin
