MIB-11F 2 Pocket Fitness Sorter

Description

MIB-11F, is a multi-currency banknote counting and sorting machine. With 2 contact image sensors, UV, MR, IR sensors it provides the highest performance in its class for counterfeit and fitness detection. Capable of processing up to 40 currencies, it can also support the reading and capture of serial numbers, cheques, barcodes and TITO tickets. Software can be upgraded via memory stick or simultaneously when connected over a LAN. It's compact design and fast processing speed make it an ideal machine for financial, retail and gaming environments.
